

Duomatic Intense | Duomatic Endurer  
Two rays of sunshine for cleaning professionals

**wetrok**<sup>®</sup>

# Duomatic Intense and Endurer: powerful operation for gleaming cleanliness

With the Duomatic Intense, cleaning professionals are walking on the sunny side of cleaning technology. A shining example is the easy, well-arranged touch display, providing total transparency. The machine operator carries out the proper manual procedures intuitively. Additional highlights include the 55-litre water tank and the upright handle with height adjustment during cleaning.

### Touch the screen and you're ready to go: comfortable touch display

Large, coloured, clear overview. Over six control buttons make the machine ready to operate in a flash. They manage the water volume, brush pressure and dosage, and monitor the load status of the battery. You can also switch to ECO mode and benefit from numerous additional functions.

### Everything under easy control: ergonomically-designed upright handle

You always work in the optimal position, as the upright handle can be adjusted even during operation. Thanks to a parallelogram, the display always remains in perfectly clear view. The upright handle saves space in the storage room.

### Filling-up made simple: hose coupling and auto-stop.

If the Duomatic ever runs out of water, no problem: With one click, you can hook up the hose coupling to the water tap – and filling can begin. The water supply will be shut off automatically, once the tank is full.

### Your feet stay dry during cleaning: the suction nozzle with Power-Whirl

No sooner is cleaning complete, the floor is dry: Wetrok's patented innovative Power-Whirl is the key. The suction nozzle produces an optimal suction whirl, which dries moisture on the ground immediately without a trace, whilst simultaneously reducing power consumption.

See the Wetrok Duomatic Intense and Endurer in action for yourself.

Watch film

When you have a large area to handle, you're guaranteed not to run dry with the Duomatic Endurer. Because this high-performance machine operates with 80 litres of fresh water. One tank filling is enough to make large areas sparkle in one round.

Power-driven, the Duomatic Intense and Endurer almost move like magic. It goes without saying that work is completed without fatigue. With the optional extra lithium battery, both models can hold up long after sundown.

**Change at the push of a button:  
Eco or Power**

The Duomatics are flexible and can be adapted to the degree of soiling. Daily cleaning can be performed in ECO mode. You can clean heavily-soiled areas with the Wetrok Power Shot.

**Not too much, not too little:  
correctly dosed, the easy way**

The automatic dosage system ensures the correct proportion of water and chemicals. The pleasing result is a clean floor without streaks. You'll also be delighted about saving money and protecting the environment from unnecessary chemical usage.

**Short charging times:  
Lithium iron phosphate batteries**

The Duomatic Intense and Endurer draw their power from lithium iron phosphate batteries, which provide for consistently high performance. Wetrok lithium batteries are built for a long machine life (batteries are not included in delivery).

**Easy and ergonomic: brush handling  
at the push of a button**

With the Duomatic Intense, the brushes can be attached at the push of a button and ejected after cleaning is complete. It doesn't get any easier than this. And never again will you have to get your hands dirty with used pads or brushes.

# Duomatic Intense and Endurer: the long-lasting power to tackle heavy-duty jobs

- **Large colour display:** ready to go in a flash, and everything is always under control
- **Movable upright handle:** also adjustable when in motion, for a constant clear view to the display
- **Suction bar with Wetrok Power-Whirl:** for dry floors as you pass
- **High-quality lithium batteries:** environmentally friendly and as durable as the machine
- **Automatic brush function:** Mount and remove the brushes with the push of a button
- **Most compact machine in its class**
